## **DETAILED ACTION**

### ***Response to Amendment and Arguments***

1. The amendment filed on 10/04/2007 has been entered. The amendments to the claims overcomes the 35 USC 112 second paragraph issues raised in the office action mailed on 07/02/2007. However, a new 112 issue is not present in amended claims 47-50. New claims 68-75 are directed to inventions different from the originally elected invention defined by claims 33-37, 47-53, 60, 61, 64, and 67. The terminal disclaimers filed on 10/01/2007 overcome the obvious type double patenting rejection set forth in the office action mailed on 07/02/2007.

### ***Election/Restrictions***

2. Newly submitted claims 68-75 directed to inventions that are independent or distinct from the invention originally claimed for the following reasons:

Group I:

Claim 68:

This claim is directed to PCS having three colors corresponding to CMYK and one color corresponding to K colorant see page 33 lines 17 to page 34 line 9

Group II:

Claims 69, 70, and 71:

These claims are a method of performing black point adjustment while performing color management conversion see page 11 lines 2-13 and US Patent No. 6,108,442 at column 5 lines 34-55 and column 7 lines 20-32 and page 15 lines 5-22.

Group III:

Claim 72:

This claim is directed to one-dimensional correction in color conversion see page 17 lines 5-16.

Group IV:

Claims 73-75:

This claim is directed to color conversion using plug in software see page 13 lines 3-15.

These groups are considered as subcombinations useable together or separately.

The inventions are distinct, each from the other because of the following reasons:

Originally elected invention and Inventions I to IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination IV has separate utility such as in systems which do not use originally elected invention of claims 33-37, 47-53, 60, 61, 64, and 67. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a

continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 68-75 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Information Disclosure Statement***

3. The information disclosure statement filed 10/04/2007 cited three documents previously considered by the previous Examiner. Therefore, US Patent No. 6,072,901 and the two articles have been lined through because they were cited in the 12/29/2003 information disclosure statement and considered with the office action mailed on 07/06/2004.

***Drawings***

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description:

page 15 lines 20 and 21 makes reference to "user preferences from an input 218", however, figure 2 does not have reference number 218.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 47-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In the last wherein clause of claim 47 "the means for interpreting the source device profile" is repeated such that this claim does not clearly claim the number of profiles using forward transformation. Dependent claims 48-50 do not correct this issue.

***Claim Objections***

7. Claim 51 objected to because of the following informalities: "aid" should be "said". Appropriate correction is required.

***Allowable Subject Matter***

8. Claims 33-37, 52-53, 60, 61, 64, and 67 are allowed. Claim 51 would be allowable if the spelling error is corrected. Claims 47-50 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. Withdrawn claims 68-75 need to be cancelled.

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
